

WHAT IS A REFRACTION?

Refraction is the optical determination of your best possible vision in each eye. It is necessary to perform a refraction to determine if any medical, optical, or surgical treatment may be indicated. Your doctor recommends a refraction at the time of your annual exams.

No visual complaint can be addressed without this service and you may not receive a prescription for glasses or contacts if this service is not performed.

The fee for this service is **\$60.00**. Most insurance companies DO NOT cover it.

I hereby acknowledge that I have read the above and indicate below with my signature that I agree to have this service performed.
